From the 2014 MS150

Features

Weather Proof and UL rated

Daytime, the sun charges your devices. At night, the battery takes over. Output is 1 Amp and 2 Amp USB. They are designed to charge iPhones and iPads or anything with a USB charging cord

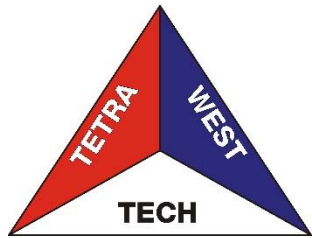

3 Models

Small	– 20 – 40 devices	– up to 25 riders	- 4 devices at a time
Medium	– 150-300 devices	– up to 150 riders	- 27 devices at a time
Large	– 450-900 devices	– up to 500 riders	- 54 devices at a time

	Regular Price	For MS150 teams
Small	– \$ 99/week	\$ 75/week
Medium	– \$499/week	\$300/week
Large	– \$999/week	\$600/week

Many riders charge a cell phone and a bike computer! And volunteers charge phones too!

Available for purchase!

What you need to provide

- A large table or two – should be on the south side of your tent
- The Solar Panel must be outside your tent and facing south. It can be turned on either the long or short side, but works best if propped up to about 30-45 degrees.
- Each rider or volunteer must provide the USB charging cables for their devices. Due to the numerous devices out there, we cannot provide the charging cables.
- 12VDC outlets will work for any device up to 15 Amps. But, AC inverters, air pumps or other car devices will reduce the number of cell phones that can be charged. This is not generally a problem on the larger systems.
- Systems need to be picked up and dropped off from Tetrawest
 - 11875 W. Little York road, STE 1105,
 - Houston, TX 77041
- Reserve your system(s) today! Call 713-849-3881
